

If fuel bills

were painted on roof tops, every thrifty
home owner would demand the economy of
TIMKEN SILENT AUTOMATIC OIL HEAT

TIMKEN *Silent Automatic*

WALL-FLAME OIL BURNERS

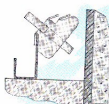

The Timken Silent Automatic Wall-Flame Oil Burner is so fully automatic it even lubricates itself.

Three-Position Flame Rim Grills — Another Exclusive Feature

Timken Silent Automatic Wall-Flame Oil Burners operate reliably and with high efficiency when supplied with fuel refined by any of the commonly used processes—straight-run, thermally-cracked, and catalytically-cracked—whichever is available in your community.

Position No. 1

Position No. 2

Position No. 3

The three different refining methods used today produce three types of fuel oils with different burning characteristics. But if you are a Timken Silent Automatic owner, this is no occasion for concern, for your Timken Silent Automatic is equipped with flame rim grills which permit matching combustion conditions with the combustion requirements of the fuel. This results in increased efficiency, lower fuel bills, a cleaner burning flame,

and, consequently, a heating plant that stays clean longer. The three positions in which the grills may be set are diagrammed above. Your Dealer will be glad to explain the combustion requirements of the type of fuel oil most widely sold in your community and then explain why one of the three grills positions best meets those requirements. *Make sure this modern feature for burning modern fuel oils is a feature of the oil burner you buy.*
