automatic gas

BOILERS Bryant Boilers are made in 36 different sizes for all types of hot water, steam or vapor heating systems. Heating sections are con-

structed of cast iron, are shaped to extract the maximum amount of heat from the gas. Controls are fully automatic.

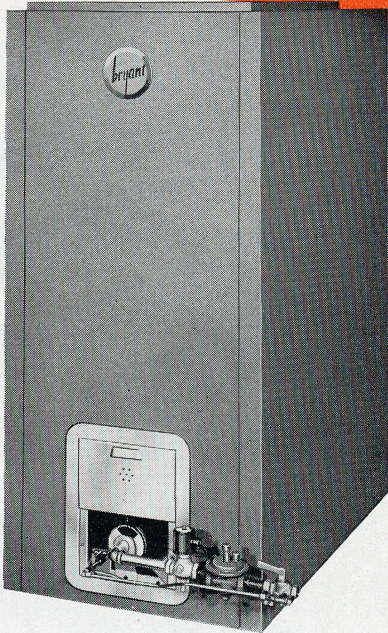

WINTER AIR CONDITIONERS

Designed to do a complete winter air conditioning job in the smallest possible amount of space, the Bryant Winter Air Conditioner does a four-in-one job — heats, filters, humidifies and distributes the air. All controls are fully automatic, completely enclosed.

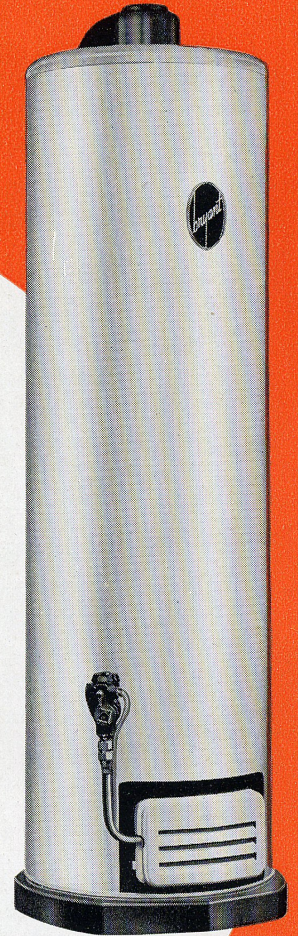

BRYANT HEATER COMPANY • CLEVELAND, OHIO

heating

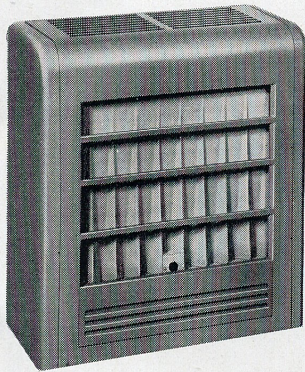

A COMPLETE LINE OF PROVED
EQUIPMENT FOR EVERY
HOME HEATING INSTALLATION

GRAVITY WARM AIR FURNACES Designed especially for small and medium size homes, Bryant Gravity Warm Air Furnaces provide clean, automatic and efficient heating. These furnaces are particularly suited to small homes where correct heat distribution can be accomplished by natural circulation. Made in 7 sizes, outputs from 33,750 to 105,000 btu per hour.

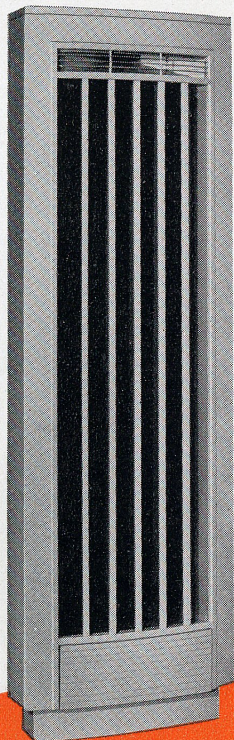

WATER HEATERS Finished in gleaming white, the Bryant Water Heater is an efficient, attractive, popular-priced heater. Unique baffle, constructed in segments, provides for easy, thorough cleaning under low ceiling conditions. Operation is completely automatic.

INDIVIDUAL ROOM HEATERS

For individual room heating, or as auxiliary units to the main heating system, Bryant's Circulating Heater (above) and Radiant Wall Heater (right) supply welcome warmth for rooms that are hard to heat. Adaptable to either manual or automatic control.

FLOOR FURNACES Bryant Floor Furnaces are designed to provide ample heat with a minimum of fuel consumption. Burners are of cast iron, grilles of long-wearing steel. 3 sizes. Available for either manual or automatic control.

REASONS WHY YOUR CHOICE SHOULD BE

bryant

- 1 Bryant has the greatest fund of engineering knowledge and manufacturing experience upon which to draw in the designing and building of gas heating equipment. For more than 40 years, Bryant has maintained its leadership in this field by astute engineering, by steadily improving the design and efficiency of Bryant products.
- 2 Bryant, manufacturing gas equipment exclusively, is not forced to compromise between gas and other fuels in the design and construction of its products.
- 3 Bryant Burners, because of their design, provide economical and efficient combustion. Burner heads are cast iron and have raised drilled ports to assure the proper supply of air for combustion. Burner heads and tubes are correctly proportioned by gas combustion experts.
- 4 Bryant Boiler Heating Sections are of ribbed cast iron construction, with staggered gas travel, and tubes are pitched to promote definite, rapid circulation. Bryant furnace sections are entirely cast iron with exclusive tubular design insuring maximum heat transfer. Selecting Bryant assures highly efficient performance, plus long years of heating satisfaction.
- 5 Bryant Controls, developed by Bryant exclusively for gas operation, are accurate and reliable. They include every desired element for positive, automatic operation, for accurate regulation of temperature and for complete protection.
- 6 Every Bryant part is tested under conditions far more severe than operating requirements.
- 7 Bryant finish is attractive and durable, jackets being of heavy metal with the pleasing Bryant Gray crackle finish and chromium trim.
- 8 Bryant products are tested, rated and approved by The American Gas Association and comply with A.S.M.E. Boiler Code.
