

Extra-rugged, lightweight Bundyweld Tubing saves installation costs. Expanded end (if specified) of one coil slips over next coil, permits fast, leakproof soldering union. Tubing doesn't dent or split under accidental hammer blows.

Make competitors' prospects your customers . . . with Bundyweld Ceiling Radiant Heating

Key to Low Cost

Bundyweld is the only tubing double-walled from a single strip, copper-braced through 360° of wall contact. It's leak-proof, thinner walled, yet stronger. It transmits heat quickly, has high bursting strength. It saves on material costs and installation time.

Standard 20' lengths of Bundyweld are easily formed into coils in shop or on job site. Expanded ends (furnished when specified) are quickly soldered into leak-proof union. Joined, lightweight coils are easily mounted onto ceiling, quickly planned over.

Field reports from architects and builders in communities all over the country stress one point: Bundyweld Ceiling Radiant Heating has helped bring them more and more "bonus" customers.

The addition of this dramatically new heating system has done much to open local markets long dominated by competitors. New sales, builders say, swung their way because of buyer conviction that Bundyweld Ceiling Radiant Heating is now a "must".

No accident. Thousands of near-ready home buyers and builders weigh Bundy ads in *Better Homes & Gardens*, *American Home*, *Small Homes Guide*, and *House Beautiful*. They talk with friends and neighbors, already living

with the system, who praise its advantages: new freedom from drafts and soot, even-temperated comfort, dirt-free walls, no awkward radiators or registers, redecorating postponed for years.

Many of these local sales were aided by our replies to nearly a ton of requests for literature, names of architects and builders offering what's so enthusiastically wanted: the first big heating advance in years; the system that makes all others obsolete. Why not share in these new profits by sending coupon now.
